```
from selenium import webdriver
import time

try:
    print("Step 1: Starting Chrome")
    time.sleep(10)

    driver = webdriver.Chrome()
    print("Chrome launched successfully")
    time.sleep(10)

    print("Step 2: Maximizing browser")
    driver.maximize_window()
    time.sleep(10)

    print("Step 3: Opening Selenium website")
    driver.get("https://www.selenium.dev/")
    time.sleep(10)

    print("Step 4: Browser launched successfully")
    print("Page Title:", driver.title)
    time.sleep(10)

    print("Step 5: Current URL:", driver.current_url)
    time.sleep(10)

    print("Step 6: Test completed successfully")
    time.sleep(10)

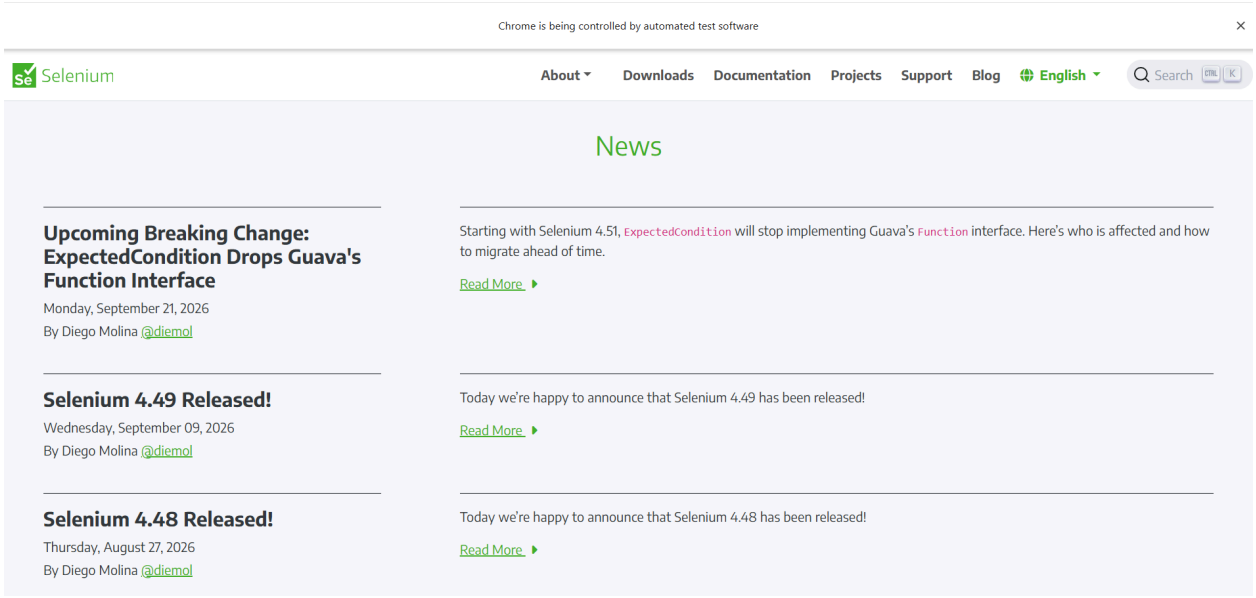

except Exception as e:
    print("Error:", e)
    time.sleep(10)

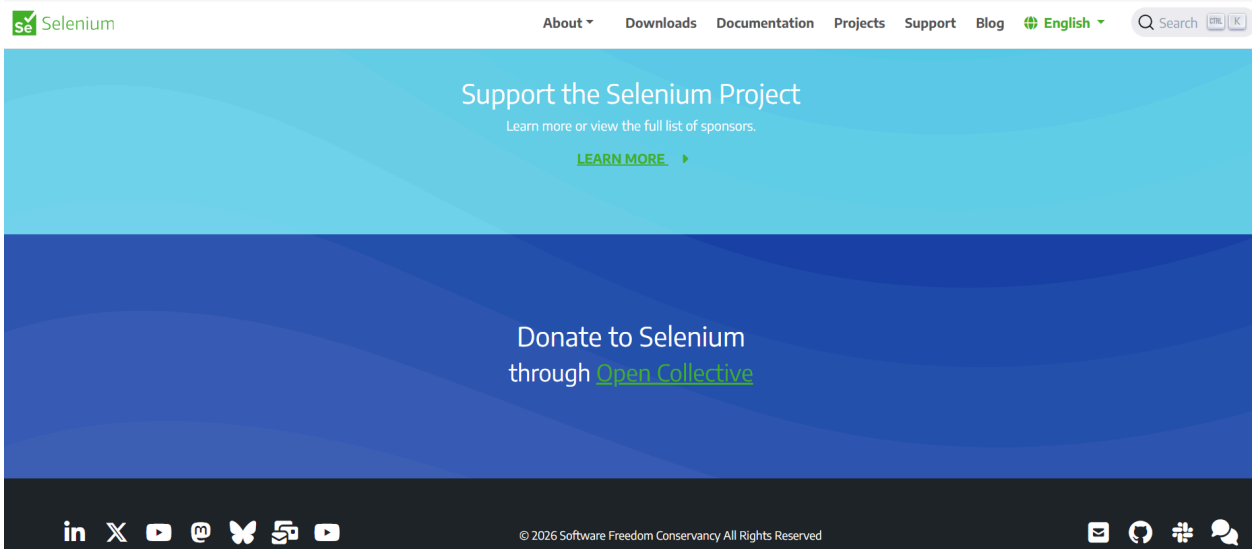

finally:
    try:
        driver.quit()
        print("Browser closed")
    except:
        pass
```

print("Tutorial 13 Completed Successfully")

Chrome is being controlled by automated test software

Upcoming Breaking Change: ExpectedCondition Drops Guava's Function Interface
Monday, September 21, 2026
By Diego Molina @diemol
Starting with Selenium 4.51, ExpectedCondition will stop implementing Guava's Function interface. Here's who is affected and how to migrate ahead of time.
